NEXIANT AND XTIVITY PARTNER TO OPTIMIZE POINT-OF-USE SOLUTIONS FOR INDIRECT MATERIAL INVENTORY MANAGEMENT

LAKE FOREST, Calif. and LONDON, Ontario – Dec. 5, 2008 – Nexiant, a leading provider of indirect (also known as Maintenance, Repair and Operations – MRO) material management solutions for the industrial market, today announced that it has entered into a joint development and marketing agreement with Xtivity Inc. , a world leader in MRO Inventory Decision Support.

Customers of both Xtivity and Nexiant will be able to dynamically optimize MRO inventory levels within maintenance and manufacturing value streams. The partnership eliminates costly manual approaches to keeping key fulfillment and replenishment software operating parameters updated and aligned with the real-time demands placed on a critical manufacturing MRO inventory.

“Nexiant is the acknowledged world leader in MRO inventory management solutions with a very impressive customer base. Xtivity will be able to provide a robust, decision support service for every item in inventory” said John Cowan, President of Xtivity. “Both companies have a mandate of MRO Excellence and this will be leveraged to increase an organization’s throughput and reduce costs by up to 40 percent.”

The Nexiant/Xtivity solution is a subscription-as-a-service (SaaS) offering that significantly reduces the costs associated with software and IT infrastructure setup and maintenance. Nexiant/Xtivity's web-based deployment model enables a streamlined implementation process, requires minimal resources and creates one of the shortest time-to-value intervals possible for an MRO initiative. In addition, the open-ended architecture supports seamless integration to common ERP, MRP, eProcurement and Maintenance Management systems supporting complete supply chain collaboration.

“Adding Xtivity’s xIO™ MRO Decision Support capability to Nexiant’s mySIM inventory control transaction platform, ensures that the right materials are available for the right people in the right place at the right time” said Mark Vettese, Nexiant’s chief executive officer. “By adjusting order points, quantities and lead times across the entire MRO inventory, the xIO will offer our customers a view of MRO inventory management metrics down to the line item level – automatically, each month. Productivity will increase and MRO inventory value will be reduced.”

About Xtivity

Xtivity, Inc. is the world leader in MRO Inventory Decision Support. Its web-based xIO MRO Decision Support Service improves productivity, reduces maintenance inventory value and provides accurate lead time information through its proven xIO Optimization Service. Xtivity’s unique service identifies, quantifies, reports, optimizes, and audits

inventory operational activity, offering immediate payback with little disruption to your organization. www.xtivity.com.
