

**Xtivity's *xIO*TM Certified as
Powered by SAP NetWeaver®**

**Solution Delivers Inventory Optimization to Customers Through Interoperability
With SAP® Solutions**

London, Ontario – April 26, 2010 – Xtivity today announced its *xIO*TM Decision Support and Optimization Service has achieved SAP certification as powered by the SAP NetWeaver® technology platform. The solution has been proven to integrate with SAP® solutions, providing optimal order points, order quantities and accurate lead times for maintenance, repair and operations (MRO) inventories.

The SAP Integration and Certification Center (SAP ICC) has certified that the *xIO* successfully integrates with business functions exposed through the SAP NetWeaver Portal 6.0 (EP-BP) component of the SAP NetWeaver platform by creating portal content via the business package.

“We are delighted to announce the successful achievement of the *xIO* now certified as powered by SAP NetWeaver,” said John Cowan, President. “The ability of the *xIO* and SAP AG to leverage the business potential of each other will prove highly beneficial to current and future customer engagements.”

As a result of the certified integration, the *xIO* now provides users with the ability to extract the necessary data for optimal *xIO* data analysis, reducing effort and providing faster results for clients.

About Xtivity

Xtivity improves productivity, reduces maintenance inventory value and provides accurate lead time information through its proven *xIO* MRO inventory Decision Support and Optimization Service. Xtivity's unique service identifies, quantifies, reports, optimizes and audits inventory operations activity – offering immediate payback with little disruption to your organization.
